The United States Peace Commission's made their final proposition to the Spanish commissioners Monday and requested a final answer on or before next Monday, November 23, on all points now in issue between the commissioners. The commission states that the United States must have the entire Philippine archipelago, and offer \$20,000,000 of the cession of the islands. The Courier Journal special says the Spanish commissioners gave no intimation of their attitude in view of the renewed demand, but at their request the joint session adjourned until Wednesday. The American commission refused arbitration on the principle of the protocol bearing on the Philippines, and declared the purpose of the United States to maintain the Philippines as an "open door" to the world's commerce.

The area of trying to saddle the blame for the miserable management of the recent war goes on and a large number of high muck-mucks continue to draw fat salaries from the government trying, so it is claimed, to place the responsibility. This thing might be kept up till dooms day and the public would be none the wiser as to who should be held down. The war was brought on by politicians, was managed by politicians and the only object they had in view was to do something by which they could win public favor. The whole thing has to do with a miserable farce and is fast getting to be a stench in the public nostrils.

REAR ADMIRAL DEWEY has contracted with Hong Kong wreckers for the recovery of the steel gunboats Isla de Luzon, Isla de Cuba and Don Juan de Austria, sunk in Manila bay or May 1. The government has already eight foreign-built men-o-war, three of them gunboats that were captured, and three cruisers and two torpedo boats that were bought. It may be well enough to raise money vessels, but it looks like a far better plan to add a little money to the cost of raising these wrecked wrecks and build new ones outright.

THE War investigation Commission has established the fact that ample medical supplies were sent with the Santiago expedition, and also that they were not to be had when needed. As to who prevented the landing of the supplies, the commission is still without full information. The truth of the matter is the politician leaders were so busy trying to do something which would help them politically, they had no time to look after the wants of the soldiers.

The people of Louisville are fixing to give the Legion a royal reception when it returns from Porto Rico. A big parade has been arranged, the women folks will have a grand dinner and the big pot will be put in the little ones. The Legion has done splendid service in the island and many compliments have been passed upon its work. Kentuckians are natural born soldiers and can always be counted upon.

The local option fight at Somerset is as warm as the final resting place of those who refuse to turn from the error of their way. The two papers down there are in a war of words and lie awake nights studying up mean things to say of each other. Tat, tat, boys. Hush your racket. A thousand years hence you will never know there was a battle in Somerset, and care less.

Thanksgiving is here and those who have been spared to enjoy another Thanksgiving with friends and loved ones should be very thankful. The recent war has taken many hundreds and thousands of our brave Americans, yet we should be thankful that such things are no more. Our hearts go out in sympathy for the ones in camp and on the far away islands, who have not the pleasure of enjoying the day with their dear ones at home. The time honored festival of Thanksgiving, originated with the Pilgrim fathers at Plymouth. Although they had not the luxuries and blessings which we enjoy their hearts were bowed down in Thanksgiving for a free country and an open Bible.

SYCAMORE VALLEY.

Your Correspondent went into the county court room last Saturday and the Fiscal Court seemed to be at sea about how to issue \$30,000 worth of highway bonds. We were reminded of the story of an Eastern King who had been saved from some great danger. To show his gratitude for deliverance he vowed he would give to the poor the weight of his biggest Elephant in silver. The great difficulty was a plan to weigh the enormous beast. The wise men of the city stroked their beards in vain. Finally a poor Sailor found a simple plan. Now we do not want to play the part of the sailor, but we want to suggest a plan that we think is feasible and will suit all. Garrard county is in the same position as a rich Parent would be who has property valued at four or five million dollars. The parent wants \$30,000. Some of his sons have a million to throw at Pinch and Middleborough birds. Plenty of his children have money yet to invest in "Gull-edge Paper," and are anxious to buy county bonds. Now the plan is simple, as follows:

Let the county court issue 300 one hundred dollar Bonds bearing 6 per cent interest payable semi-annually, redeemable in 30 years, same to be sold to no non-residents, but transferable from first purchaser. At the end of first 5 years, the county can commence to redeem said bond, which can be called in by lot by placing 300 numbers in a box that correspond with number of Bonds and drawing out 51.

The normal assets of the county is four million, the highest rate of tax for highways is 25c on the \$100. This will raise \$10,000 a month and keep up roads \$2,000 or interest on expenses and one thousand for sinking fund. Premiums on Bonds should be used to get highways in the same condition that they were before the raising of money which we think will cost fully \$10,000. We article pass a premium of \$3,000 on the issue from capitalists of the county and if the Fiscal Court does not get that offered them, throw down the bars for Eastern capitalists who are sending their agents here to buy highway bonds.

We are trying to get our plan in the form of a popular loan, as France did just after the Frank O Prussian war, and as our Gov't did when it wanted \$2,000,000.00. We listen for objections on account of high rate of interest. Money lends for it. It is the legal rate, and our own moneyed men and women have it and why not induce them to invest here? So on the 2nd day of January, or December or any day designated by the Fiscal Court the Bonds can be sold at public outcry, one at a time, with the privilege of 10. If the Bonds do not bring \$10 premium take them down and advertise for sealed bids and where sealed bids are the same give preference to county capitalist every time.

In 1887 Mr. Thomas McIntosh of Al lentown, Tenn., had an attack of dysentery which became chronic. "I was treated by the best physicians in East Tennessee without a cure," he says. Finally I tried Chamberlain's Colic Cholera and Diarrhoea Remedy. After using about twelve bottles I was cured sound and well." For sale by R. E. McRoberts.

Providing feed and shelter for the colts during winter in order that they may continue to grow and be kept in thrifty, vigorous condition will give them when grown so much better size, form and quality than the range grown horse possesses that it will prove a profitable investment of labor, feed and money, says an exchange. But it has another and valuable advantage. The young stock that is cared for in this way becomes accustomed to the presence of man and to a certain amount of handling which will make the trouble of breaking them and the danger of injuring them while they are being broken much less than in the case of horses that have been raised entirely on the range.

A Sure Sign of Croup.

Hoarseness in a child that is subject to croup is a sure indication of the approach of the disease. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse, or even after the croupy cough has appeared, it will prevent the attack. Many mothers who have croupy children always keep this remedy at hand and find that it saves them much trouble and worry. It can always be depended upon and is pleasant to take. For sale by R. E. McRoberts.
